HEAD – TALENT ACQUISITION · STRATEGIC TRANSFORMATION

Building a strong hiring system for the ₹5,000 Cr journey

A simple, practical plan to hire faster, stop people from leaving, and make hiring a key driver of business growth.

Revenue ₹3,000 → ₹5,000 Cr

~1,000 hires/yr

Leaving 45% → below 25%

Hiring time 50+ → 30 d

01 · OUR VISION

From a slow hiring desk to a smart hiring system

Today we hire only after a job opens. We will change this — plan hiring early from new-store plans, and keep candidates ready in advance. We will hire good people who stay longer, not just fill seats fast.

🎯 OUR FOUR FOCUS AREAS

- ✓ **Speed** — ready candidate lists + AI + clear timelines. Goal: hire in 30 days.
- ✓ **Quality** — proper interview scorecards + honest job preview. Goal: joiners stay past 90 days.
- ✓ **Low cost** — more referrals, fewer agencies, AI support. Goal: cost per hire ₹4,500.
- ✓ **Brand** — regular social posts + Apple brand value. Goal: more offers accepted.

First 90 days — a step-by-step plan

Done in order — we cannot speed up a broken process. First fix the basics, then build the system, then show results.

0–30 Understand & Fix Basics

- Check open jobs, time at each step, source of hires & who is leaving (store-wise).
- Make everyone use one hiring software (ATS).
- Daily focus team for the 100 new-store jobs.
- Restart referral scheme with instant reward.

31–60 Build the System

- Standard interview questions + culture-fit scorecards.
- Keep ready, pre-checked candidate lists.
- New-joiner plan: ready Day 1 + check-ins at 30/60/90 days.
- Start AI screening + chatbot; reduce agency contracts.

61–90 Show Results

- Early wins: hiring time ~40 days; fewer offer drop-outs.
- Start employer-branding posts.
- Launch a live hiring dashboard for leadership.
- Present the full 12-month plan.

The 12-month plan in four quarters

Each quarter builds on the last. We finish one quarter's base work (the gate) before starting the next.

Q1 Foundation

→ Hiring software fully used · standard interviews · referral scheme · new-joiner plan. **Gate: ATS used by >90%.**

Q2 Speed

→ AI screening at scale · ready lists for top 5 jobs · time limits per step. **Gate: hiring time ≤35 days.**

Q3 Quality & Brand

→ Employer-branding push · leadership hiring guide · career paths live. **Gate: people leaving <35%.**

Q4 Optimise

→ Reduce cost & agencies · plan hiring in advance. **Gate: 30 days · ₹4,500 · agency <4%.**

04 · TEAM & STRUCTURE

A team that can hire 1,000+ people a year

A central expert team for tools, data & standards, plus recruiters placed inside each business so they work closely and move fast. About 13–15 people in total.

Volume / Retail

~820/yr

Store & service staff hiring.

Corporate & Enterprise

~160/yr

B2B · Education · Corporate.

Leadership & Niche

IN-HOUSE

Senior hiring, done in-house.

TA Ops & Data

SUPPORT

Software · AI · dashboards.

Employer Brand

PIPELINE

Always-ready sourcing.

 **Team size:** one volume recruiter handles ~120–150 hires/year, a corporate recruiter ~40–60. So ~6–7 recruiters, 3–4 sourcers, 1 data person, 1 branding person + 4 leads.

05 · FASTER HIRING

Reduce hiring time from 50+ to 30 days

Hiring is slow because we start from zero for every job and wait too long for manager feedback. The fix: keep candidates ready and run steps together with clear time limits.

50+

🎯 HOW WE MAKE HIRING FASTER

- ✓ **Keep ready candidate lists** for high-volume jobs → fill in days, not weeks.
- ✓ **Run steps together** — screening, interview & booking at once; AI screens 24x7.
- ✓ **Fixed time limits** — manager feedback in 2 days, offer within 5 days.
- ✓ **Instant booking** by chatbot for store jobs; ready panel for leadership.
- ✓ **Cut offer drop-outs 28% → under 12%** with faster process & clear salary upfront.

06 · STOP PEOPLE LEAVING

Reduce people leaving: 45% to below 25%

Most people leave in the first 3 months — about 20% within 45 days, and ~70% of all leavers within 90 days. Keeping people starts from the day we hire.

45%

TODAY

12 MONTHS

<25%

24 MONTHS

🎯 OUR THREE-STEP PLAN

- ✓ **A · Hire right** — check culture fit, show honest job preview, and use 40%+ referrals (they stay longer).
- ✓ **B · Settle them well** — ready Day 1, give a buddy, check in at 30/60/90 days. One owner for first-90-day retention.
- ✓ **C · Keep them** — clear growth path (Advisor → Senior → Team Lead → Store Manager) + early alerts when someone may leave.

AI gives speed — and cuts the cost in half

AI handles the repeated work — searching, screening, scheduling and answering candidate questions. Cost mainly drops from more referrals, fewer agencies, and fewer re-hires.

Hiring tools — step by step

- **Step 1** — full hiring software (ATS) + live dashboards.
- **Step 2** — AI screening + a WhatsApp/chat assistant for high-volume jobs.
- **Step 3** — AI candidate search + early alerts on who may leave.

 **COST: ₹9,000 → ₹4,500**

- ✓ **Referrals 20% → 40%+** — cheapest channel, and people stay longer.
- ✓ **Agencies 9–10% → under 4%** — do sourcing & leadership hiring in-house.
- ✓ **AI automation** — lower cost per candidate at high volume.
- ✓ **Less leaving** — each replacement avoided saves a full hiring cost + training time.

 **The good cycle:** referrals stay longer → fewer people leave → fewer re-hires → recruiters focus on growth, not replacement → agency money moves to cheaper, better channels.

How we measure progress — and reduce risk

WHAT WE TRACK	NOW		GOAL
Hiring time	50+ d	→	30 d
Cost per hire	₹9,000	→	₹4,500
Referral hiring	20%	→	40%+
Agency spend	9–10%	→	<4%
Offer drop-outs	28%	→	<12%
People leaving	45%	→	<25%
Stay past 90 days	baseline	→	90%+

Best early signal: **how many new joinees stay past 90 days** — it warns us before yearly attrition rises.

⚠ RISK → WHAT WE DO

- ⚠ **Competitors hiring fast** → strong brand + quicker offers + referrals.
- ⚠ **Speed vs quality** → ready candidate lists + proper assessment.
- ⚠ **Attrition not falling** → focus first on joining & the first 90 days.
- ⚠ **Slow software adoption** → make ATS compulsory; link to manager reviews.
- ⚠ **Sudden demand** → 100-hire buffer + ready candidate lists.

 **Review rhythm:** weekly team review (operations) · monthly review with CEO/CHRO (strategy).

OUTCOMES & THE ASK

The same ~1,000 hires, now driving real growth

We cannot reach ₹5,000 Cr if 45% of people keep leaving. Fix retention and speed together — faster, cheaper, and people who stay.
